## Math Around Us

The purpose of this assessment is to inquiry into the student's general awareness of number, space and time.

Suggested prompts: Tell me what you're thinking. Think about it again.

| When (what month) does school begin/end? |  |
| :--- | :--- |
| What month is Hallowe'en/Christmas in? <br> (ESL students may not be familiar with these <br> celebrations so you could ask about ones like <br> Diwali.) |  |
| When is your birthday? |  |
| What year were you born? |  |
| How old will you be when you're in Grade <br> $?$ |  |
| (Add 2 years to present grade) |  |
| How much does a chocolate bar cost? <br> (or chose something that the student will be <br> familiar with) |  |
| When do you usually watch TV? About how long <br> is the show you watch? |  |
| What time does school start? |  |
| What time is lunch? |  |
| About how long is recess? |  |
| About how many hours are we in school? |  |
| Do you know any of your friends' or family <br> members' phone numbers? (other than the <br> child's own) |  |
| What is your address? |  |

Assessment of Mathematical Awareness: ongoing throughout the assessment

|  | NOT | SOMETIMES | ALWAYS |
| :--- | :--- | :--- | :--- |
| DISPOSITIONS/HABITS OF MIND: | EVIDENT | EVIDENT | EVIDENT |

| - Tries to make sense |  |  |  |
| :--- | :--- | :--- | :--- |
| - Is confident, willing to take risks |  |  |  |
| - Perseveres |  |  |  |
| - Tries to find more than one strategy |  |  |  |

|  | NOT | SOMETIMES | ALWAYS |
| :---: | :---: | :---: | :---: |
| LEARNING CHARACTERISTICS: | EVIDENT | EVIDENT | EVIDENT |

| - Ability to organize (materials, thoughts, work...) |  |  |  |
| :---: | :---: | :---: | :---: |
| - Ability to articulate thinking and procedures verbally |  |  |  |
| - Ability to model or to represent thinking on paper (using pictures, numbers, or words) |  |  |  |
| - Ability to use mathematical language |  |  |  |

## Up and Through the Hundreds

1. Write the numbers to the end of the boxes.

Begin at 91 and count by ONES to the end of the boxes.

| 91 | 92 | 93 |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

2. Write the numbers to the end of the boxes.

Begin at 421 and count by TENS to the end of the boxes.

| 421 | 431 | 441 |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

3. Write the numbers to the end of the boxes.

Begin at 205 and count by HUNDREDS to the end of the boxes.

| 205 | 305 | 405 |  |
| :--- | :--- | :--- | :--- |
|  |  |  |  |

## Read and Write Numbers Through Hundreds

Write the numbers the teacher says. Here is an example:
If the teacher says twenty-two, you write 22.
A. $\qquad$

E. F.

Read these numbers aloud:

## G. 65

H. 113
I. 307
J. 780
K. 982
L. 1005

## Compare and Order

SET A: Cut out each of the following numbers. Order them from smallest to greatest and record them below:
$\overline{\text { Smallest }}$

$\qquad$

## Compare and Order

SET B: Cut out each of the following numbers. Order them from smallest to greatest and record them below:

Smallest
$\qquad$

Name $\qquad$ Grade: $\qquad$ Date: $\qquad$

## Friendly Numbers

Solve the following question using two different strategies:
A. $8+7=$

Explain your strategies using words, pictures, and/or numbers and symbols.

| One way I solved the question | A second way I solved the question |
| :--- | :--- |

B. $12-7=$

Explain your strategies using words, pictures, and/or numbers and symbols.
One way I solved the question

## Addition: How Did You Do It?

| $26+37=$ | $126+237=$ <br> My estimate is __ My estimate is _- <br> Show your thinking below! <br> Show your thinking below! |
| :--- | :--- |
|  |  |

Name $\qquad$ Grade: $\qquad$ Date:

## Subtraction: How Did You Do It?

| $62-23=$ <br> My estimate is $\qquad$ <br> Show your thinking below! | $562-423=$ <br> My estimate is $\qquad$ <br> Show your thinking below! |
| :---: | :---: |
|  |  |

Name Grade: $\qquad$ Date:

## Missing Addends Task

Solve and explain your strategies.

Name $\qquad$ Grade: $\qquad$ Date: $\qquad$

## Barnyard Legs

I counted 36 legs in the barnyard.
Some belonged to cows and some belonged to chickens. How many cows and chickens might have been in the barnyard?

Show different ways and explain your thinking.
$\qquad$ Grade: $\qquad$ Date: $\qquad$
How Many Do You See In All? How Do You See Them? How would you express this as a multiplication equation?

How Many Do You See? How Do You See Them? How would you express this as a multiplication equation?

Name $\qquad$ Grade: $\qquad$ Date: $\qquad$

## Shake and Spill

Take 12 two-sided counters in your hand. Shake and spill them onto your workspace.

Record the number of red and yellow.

What fraction of the set is red?

What fraction of the set is yellow?

Name $\qquad$ Grade: $\qquad$ Date:

## Mystery Fractions

Each of these number lines have a mystery fraction shown with a?
What is the mystery fraction? How do you know?
What else do you notice?

Name $\qquad$ Grade: $\qquad$ Date: $\qquad$

## Which One (Mass)

What unit would you use to measure the following items?

A regular sized chocolate bar could be measured using $\qquad$

The weight of a teenager could be measured using

Name $\qquad$ Grade: $\qquad$ Date: $\qquad$

## Which One (Capacity)

What unit would you use to measure the following items?

A juice box could be measured using

A milk jug could be measured using

Name $\qquad$ Grade: $\qquad$ Date: $\qquad$

## Which One (Linear)

What unit would you use to measure the following items?

An ant could be measured using $\qquad$

A pencil could be measured using

The distance it would take to drive from Surrey to Richmond or Vancouver could be measured using
